Business

Data

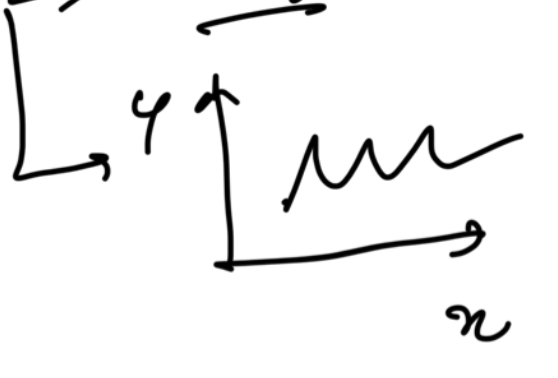
mgt

Data ⇒ Myth

⇓

only. Rabi ⇒ coding

- Analytics



Data ⇒ collection of facts

- collection of Information
- Raw and unst.

Finance ← Data ⇒ Raw information

⇓

Pattern + Noise

⇓

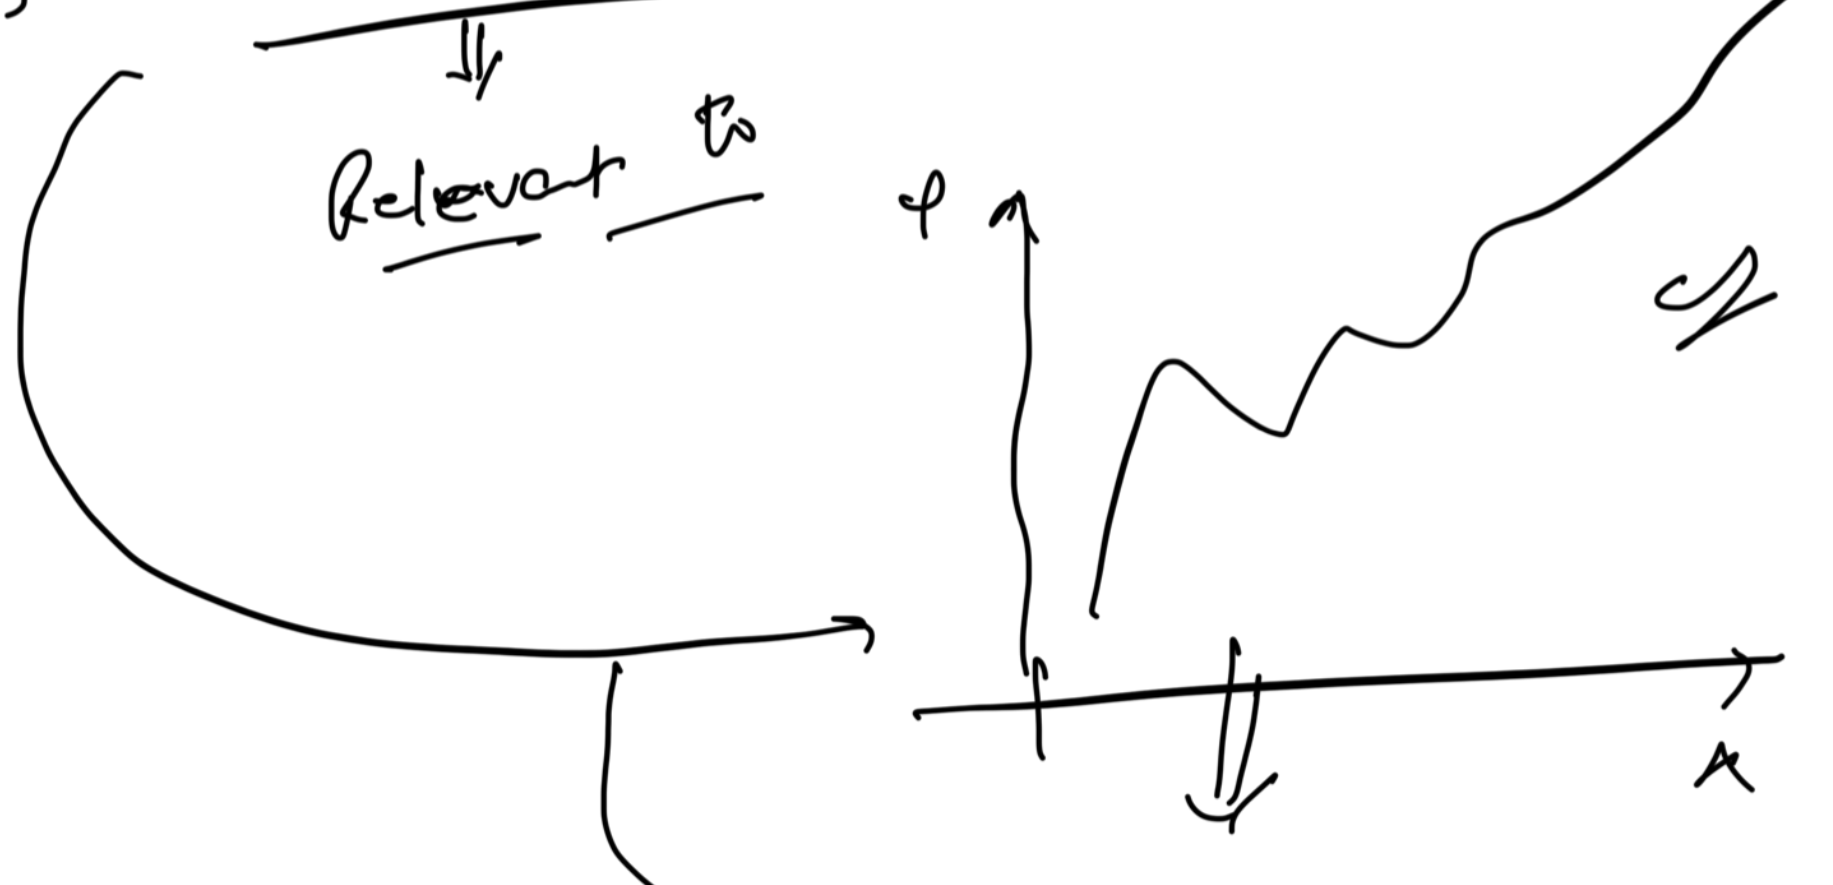
Image

medical field

Webscraping / Sentimental Analysis

⇓

Relevant to



Data centric solution

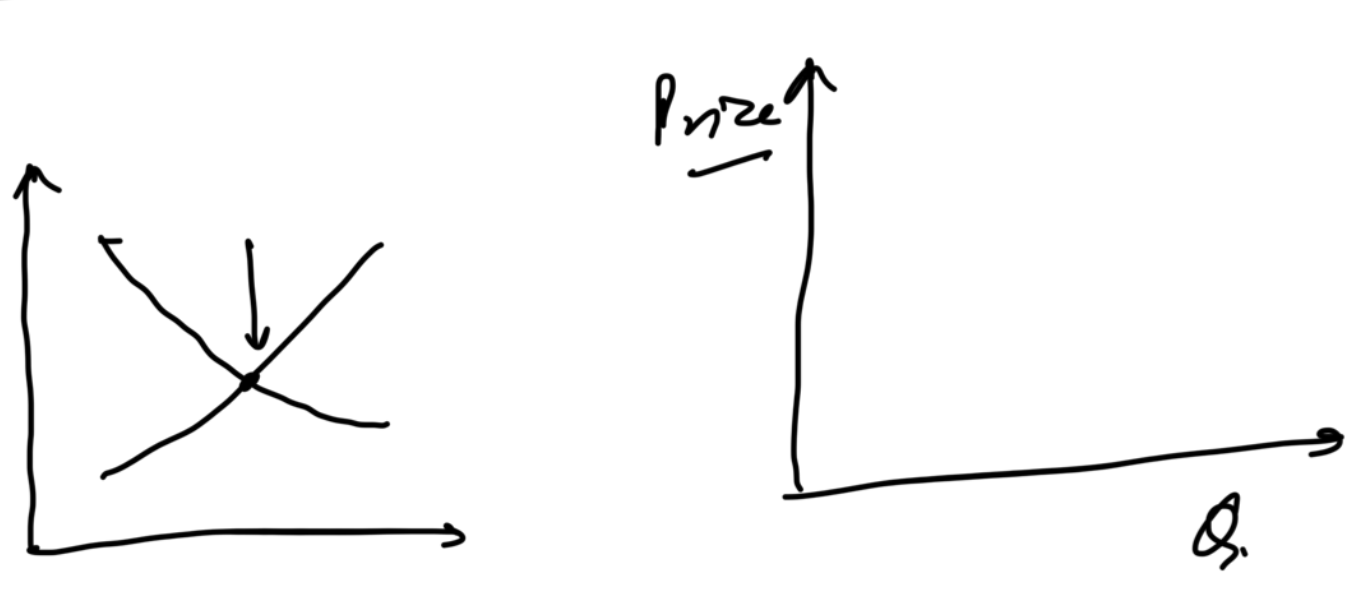
Data

- computation Resources
- Advance Alg. ⇒ LLMs, ML; Reinforcement
- How to clean your Data

→ Data Scientist

↓

Data centric solution to company



No. of custo >>> No. of Rider / deli.

Data → ML → Prize

ML → Economics

Data ↳ what actually is happening

Supply chain

Economics ↓ why it is happening?

what needs to be done to control price

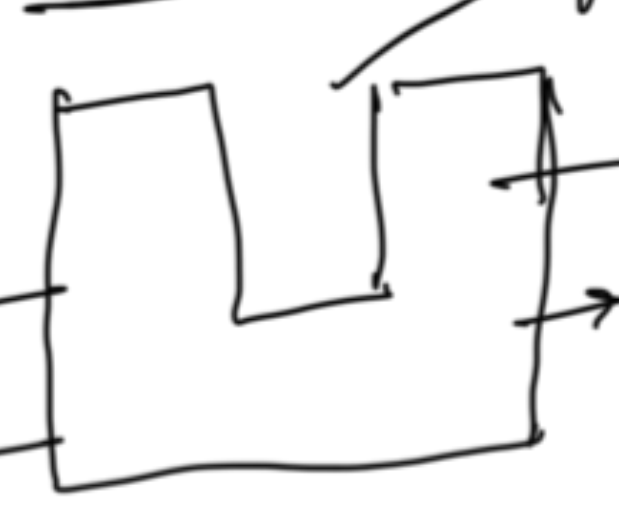
Economics ⇒

Actual happening → Causes of this

→ Best possible solution

} can be understand with the help of Economics

Ramu Tea Stall → Business ↳ single



Initial

Tea ⇒ ₹10/-

Coffee = ₹20/-

Tea - ₹10/-

Coffee ⇒ ₹20/-

Observations:

① The sales of Tea ↑ 40%.

② The sales of coffee ↓ 50%.

③ The sales of Samosa ↓ 20%.

⇒ why ??

Less →

↓

20% ⇒ Incr

elastic

Inelastic ← Coffee + Samosa → 0

scarcity

↳ Trade off

₹1000/-

Coffee + Samosa → 20%

Tea + Samosa

Why to study Economics

⇓ simplify the word

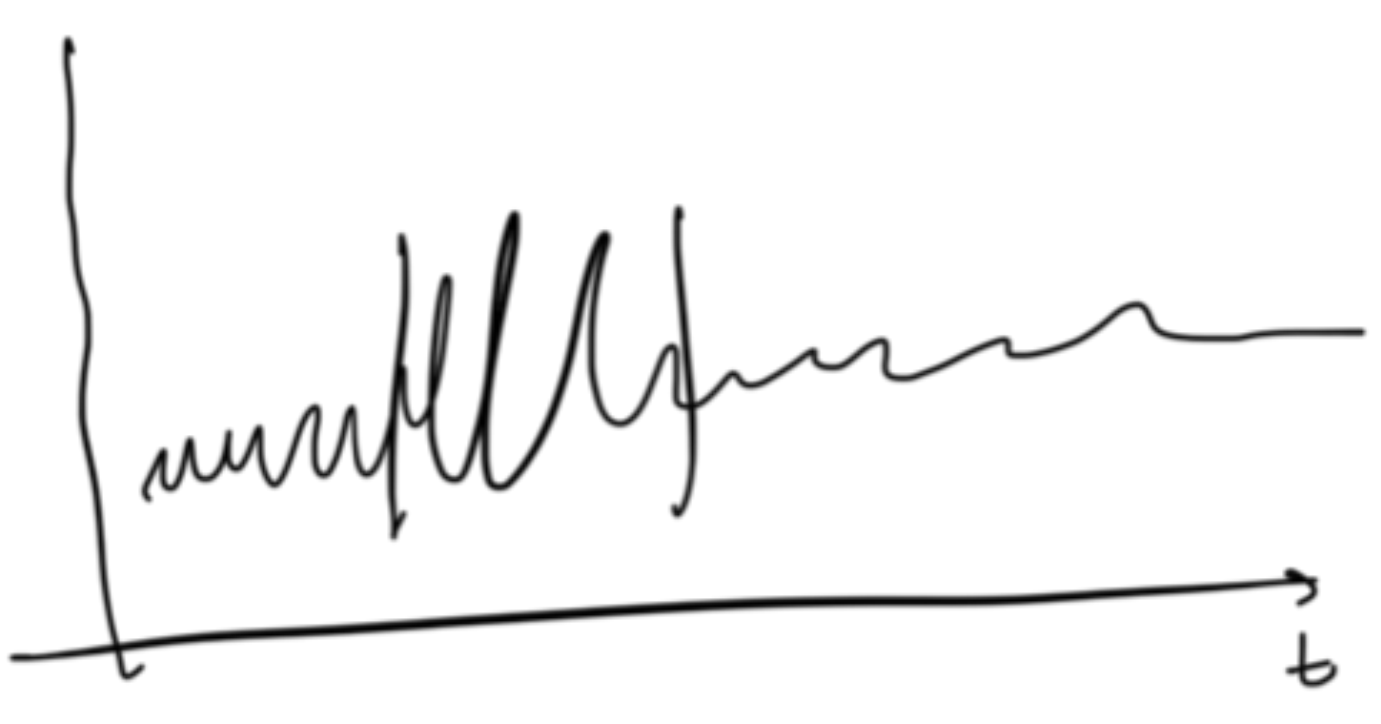
Scarcity → Root cause of Economics

Human wants ↓ Unlimited wants

Limited Resources

Need to allocate Resources (Available)

To fulfil Human wants ⇒ Get maxm. Satisfaction



optimization ⇒

- objective fn → Data ↳ Get 100% accuracy
- constrains → finite computation, finite Time, finite memory, finite manpower

} Data Science Company

---

objective :→ maximise ⇒ Growth of Startup

- finite Capital
- finite Raw materials
- finite Time
- finite Production capacity (limited machines)

Micro ⇒ Individual company ; single company ; → Ex. → Swiggy, Zomato, TCS,

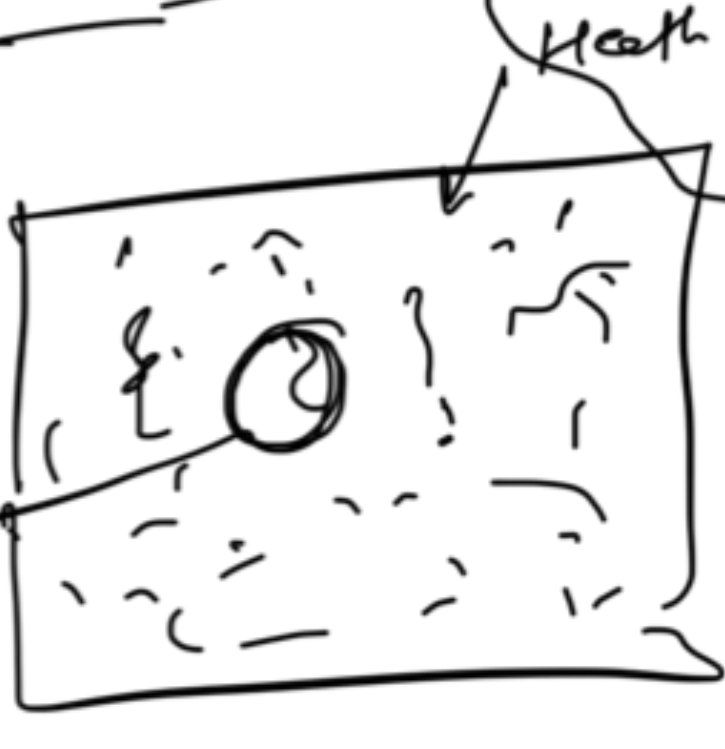
Macro :

UPI → Successful Transaction

↓

Pending.

Macro Economics ← Health of forest



Micro economics
